

## Extend The Boundaries of the OnGuard Access Control System

### SMI have extensively integrated with Lenel's OnGuard, and enhanced the capabilities of their popular Mobile Verification System

Main features of the new integration and new architecture include:

- ✓ Access Rights checking
- ✓ Support for large cardholder databases
- ✓ Support for large numbers of handhelds

- ✓ OnGuard Cardholder and System data synchronised to SMiHost replicated database
- ✓ Handheld card-read transactions processed via WiFi against SMiHost database for Online use
- ✓ Access Rights and Card validity check performed with display of cardholder details
